

ENVIRONMENTAL POLICY

YY Security Installations Ltd (YYSI) is committed to providing services to its clients, which minimise the impact to the environment where possible.

The operations will be controlled to ensure that pollution is prevented, and that all relevant safety and environment legislation is adhered to, during the provision of the client service.

In order to understand the effect of the Company's operations they will be continually reviewed so that environmental objectives and targets can be set to measure performance in achieving continual environmental performance.

The senior management of the Company will review, at least annually, the environmental record of the organisation as part of the implementation of an integrated management system.

Employees, sub-contractors and suppliers will be made aware of the Company's environmental system relevant to their role in the operation.

Timber Policy

YYSI will endeavour, where practical and safe, to re-use old timber from sites on which it works.

For purchase of new timber, the company will endeavour to source material from companies who actively promote:

The use of timber from sustainably managed forests

The use of timber from legal and certified forests

The elimination of products originating from illegally harvested timber

The maintenance of the chain of custody certification relating to timber products

Co-operation

In honouring its commitment to minimise any adverse effects on the environment, the Directors will ensure all his personnel will co-operate and give practical support towards the achievement of these objectives.

Mr Steve Owens is responsible for implementing this Policy Statement.

This policy will be reviewed as a function of the management system, and will be available upon request.

Signed:

S. OWENS

Director
