

SIMPLIFIED OPTIONS FOR SAFEGUARDING YOUR HOME

CCTV

Not only is a CCTV system a great way of identifying burglars or intruders after the fact, but it also possesses powerful applications as an initial deterrent too. Strategically directing CCTV cameras towards key entry points to your home will likely scare off potential criminals before they even make an attempt to enter your premises.

For a deeper dive into the positives of installing a CCTV system in your home, take a look at this blog post on our website.

ALARMS

An alarm system is a much less passive way of deterring would-be burglars than a CCTV system. Whether of the audible-only or monitored variety; an alarm system in your residence acts as an active & pressing warning to intruders, and will scare most thieves off before they've even managed to get inside.

For a closer look at the pros of purchasing a residential alarm system, read through our blog post on the subject.

DOOR ENTRY SYSTEMS

A door entry system is the ultimate tool for keeping unwanted callers out of your residence. Whether you opt for a video entry option, or a simple two way intercom system, you'll have the power to grant or deny access via use of an electronic door lock mechanism."

Discover the benefits of a door entry system by following the button below.
